- Platforms:** Vercel, Netlify, Firebase, Supabase, MongoDB Atlas, Render
- Tools:** Git, GitHub, Postman, Clerk, Docker, Figma
- Analytics & Product Scaling:** PostHog, Google Analytics, Microsoft Clarity, Google Ads, Meta Ads

Projects

Booking.com - Hotel Booking Platform (Frontend)

Feb 2026

- Developed an Airbnb-inspired hotel booking SPA with dynamic search, hotel listings, checkout flow, and real-time payment status handling using React, Vite, and React Router
- Built the React frontend and integrated REST APIs via Axios and reusable custom hooks to manage hotels, bookings, user profiles, authentication, and protected routes
- Engineered an admin dashboard for managing hotels, rooms, reservations, and inventory with lazy-loaded routes, modular UI components, form validation, and scalable state management
- Deployed the frontend on Vercel and managed backend deployment on Render, delivering a responsive and production-ready user experience

[Booking.com](#) | [React 19, React Router v7, Tailwind CSS, shadcn/ui, React Hook Form, Zod, Axios, Zustand, Framer Motion]

Professional Experience

J2L Technologies

Jun 2024 – Dec 2024
